

# 4 STROKE ADVANTAGE

STRONGER. LIGHTER. FASTER. **SMARTER.**

Reverse

Neutral

Forward

## YAMAHA SHIFT DAMPENING SYSTEM (SDS)

Ingeniously simple and seriously effective.

Nothing delivers smooth and quiet shifting in and out of gear like a Yamaha SDS propeller. The patented Shift Dampener System (SDS) has been designed to absorb the shift shock transferred through the engines gearbox.

Yamaha's SDS propellers are compatible with engines from FT60 to F350hp and are available in polished stainless steel or white aluminium.

\*White aluminium compatible with FT60 - F130A
